Catalogue 2022

Authentic Classic Range

GIRLING

lucaclassic4x4.com

Lucas. Classics live forever.

Since the very first car wheel on the very first car hit the road over a hundred years ago, Lucas has been at the forefront of component manufacture and supply for both OE and the aftermarket. In fact, Lucas is the oldest continually trading automotive brand in the world.

Having been in business for 147 years means that we not only know a lot about vehicles today, but the vehicles of yesterday as well.

Authentic Classic Range

In the second half of the 20th century, you would have been hard pressed to find a vehicle on the road that didn't have some Lucas OE content, for electrical, diesel and braking. In fact, Lucas designed products are still used on new vehicles manufactured now.

Today, we're still at the top of our game as a global business. Our famous green boxes can be found in every corner of the world.

If you're keeping a classic vehicle on the road, keep it authentic as well.

LUCAS

LUCAS

But for us, our heritage is vital, as it is what sets us apart from others. Hard won experience of innovating and providing quality parts that are durable and reliable, straight out of the box.

Authentic Classic Range

And now, we are celebrating that heritage with a new range of classic parts specifically designed for restorers, workshops and consumers who want to keep their classic vehicles faithful to the original by fitting Lucas parts developed, tested and engineered to the original specification.

Now, you can have the real thing. Lucas Classic parts are often reproduced from original tooling, re-manufactured and re-engineered by trained experts following original Lucas product manuals and technical drawings.
